

Facility Name: _____ **EIQ No.:** _____

SECTION 2 - APPLICABLE REQUIREMENTS (AR)

This section of forms, Section 2 - APPLICABLE REQUIREMENTS, will be used to report all air quality regulatory requirements that the facility is subject to.

Utilize the information obtained in Section 1 to identify federal and state regulations that apply to air emission sources. Because additional regulations under the Clean Air Act Amendments of 1990 are, and will continue to be established in the future, you may need to consider the applicability of other rules not listed in this application material.

In Section 2 all emissions standards, record keeping, reporting, testing, operating and maintenance procedures that the source is subject to must be listed and referenced to the rule (and current permit if applicable) which establishes the requirements.

INSTRUCTIONS FOR SECTION 2:

1) Choose the option for reporting all applicable requirements at the facility:

Option A) By Emission Unit: Fill out a separate form for each emission unit at your facility. For this option, make sure that you have addressed how you will be in compliance with each requirement that applies to your facility.
Use Form AR-01.

Option B) By Applicable Requirement: Fill out a separate form for each air quality rule and the regulation that applies to all or part of the facility - list affected emission units. **Use Form AR-02.**

Both options may be employed in a single application.

2) Determine Compliance Requirements in federal and Iowa Air Quality rules and regulations.

Many air quality rules and regulations include specific monitoring, testing, record keeping, reporting, and operation and maintenance requirements. This submission must include the requirements that are included in all rules and regulations that apply to the facility.

3) Propose Compliance Demonstration Practices for Requirements.

If an applicable requirement does not specify exactly what you must do to show compliance, you may propose practices that are appropriate to the facility.

- 4) **Address Proposed Limits, if Included in the Application.**
Current (prior to limit) applicable requirement information, on the emission units for which limits are being proposed, must be included in Section 2. If the application includes requests for limits, attach separate copies of forms AR-01 and/or AR-02 for the proposal to Part 2, Section 4.

- 5) **Address Alternative Operating Scenarios and/or Emission Trading, If Applicable.**
If you are proposing alternative operating scenarios or emission trading in your application, you must complete a separate compliance plan for each proposed alternative operating scenario or emission trade and include them in Part 2, Section 4.
